## SHEEP 16

### A Free Choice Supplement for Sheep on Pasture

**Sheep 16** supplement is carefully formulated to meet the nutrient requirements of sheep of all ages. This unique supplement is second to none when compared to other low-moisture blocks. This block is the product of a state-of-the-art patented process that provides a unique 24-hour feeding system. **Sheep 16** is an exceptionally dense block that will give you the most for your money. Here's how:

- ✓ **Economical:** A low feeding rate means lower feeding costs (on a per head per day basis).
- ✓ **Mineral Fortification:** This supplement is Vitamin and Mineral fortified, eliminating the need to feed additional free-choice minerals, resulting in a significant supplemental feed cost savings.
- ✓ **Weather Resistant:** The patented, "continuous flow" system creates a quality, low-moisture, exceptionally dense block that maintains its integrity even in hot, humid weather or precipitation.
- ✓ **Minimal Labor:** **SmartLic<sup>®</sup> Sheep 16** is easy to feed. Simply place the blocks in areas of easy access to the livestock.
- ✓ **Returnable Steel Barrels** are economical and environmentally friendly and eliminate the expense of additional feeding equipment. Ask us about other available packaging options and packaging size options.

## FEEDING DIRECTIONS

Provide free choice as a supplement to sheep at a rate of one block for each 25 to 35 head. Place in pasture near areas frequented by livestock, such as watering locations, shade or loafing areas. Sheep normally consume approximately 3 to 4 ounces per head per day. Consumption may vary depending on climate, grazing conditions, condition of livestock and/or availability of other feeds. In situations where climate and/or other factors result in consumption less than expected, intake of supplement can be increased by providing additional blocks per pasture.

Provide access to fresh water and free-choice salt at all times.

## GUARANTEED ANALYSIS

Crude Protein, minimum .....	16.0%
Crude Fat, minimum.....	4.0%
Calcium, minimum.....	2.0%
Calcium, maximum .....	2.5%
Phosphorus, minimum .....	2.0%
Potassium, minimum .....	2.5%
