

DAIRY DRYLIC® LS

DAIRY DRYLIC® LS

A Free Choice Supplement for Non-Lactating Dairy Cattle

Dairy DryLic® LS is **Nutritionally Engineered®** for non-lactating dairy cattle. It is essential for maintenance during pregnancy and preparation for calving. This unique supplement is second to none when compared to other low-moisture blocks. This block is the product of a state-of-the-art patented process that provides a unique 24-hour feeding system. **Dairy DryLic® LS** is an exceptionally dense block that will give you the most for your money. Here's how:

- ✓ **Economical:** A low feeding rate of 0.5 to 1 lb per head daily can significantly minimize your feeding costs on a cost per head per day basis.
- ✓ **High Mineral Fortification:** This supplement is Vitamin and Mineral fortified eliminating the need to feed additional free-choice minerals, resulting in a significant supplemental feed cost savings.
- ✓ **Weather Resistant:** The patented, "continuous flow" system creates a low-moisture, exceptionally dense block that maintains its integrity even in hot, humid weather or precipitation.
- ✓ **Minimal Labor:** **SmartLic® Dairy DryLic® LS** is easy to feed. Simply place the block in areas of easy access to cattle.
- ✓ **Returnable Steel Barrels** are economical and environmentally friendly and eliminate the expense of additional feeding equipment. Ask us about other available packaging options and packaging size options.

FEEDING DIRECTIONS

Provide free choice as a supplement to non-lactating dairy cattle at the rate of one block for each 10 to 15 head. Place in lot or pasture near areas frequented by livestock, such as watering locations, shade or loafing areas. Cattle typically consume 0.75 pound per head daily. Consumption may vary depending on climate, grazing conditions, condition of livestock and/or availability of other feeds. In situations where climate and/or other factors result in consumption less than 0.75 lb per head daily, intake of supplement can be increased by providing additional blocks per pasture or lot. Provide access to fresh water at all times.

Limit salt intake to no more than 1 ounce per head daily.

Include **SmartLic® NE-30** in your Replacement Heifer program. **SmartLic® NE-30** is **Nutritionally Engineered®** supplement that provides essential nutrients to support growth, reproductive performance and forage utilization.
