

NE-MAG 12, NE-MAG 22

A Free Choice Supplement for Cattle on Pasture

These **Nutritionally Engineered**[®] supplements are completely mineral-fortified with added magnesium and are designed to complement different stages or levels of forage quality. These unique supplements are second to none when compared to other low-moisture blocks. These blocks are the product of a state-of-the-art patented process that provides a unique 24-hour feeding system. **NE-Mag 12** and **NE-Mag 22** are exceptionally dense all-weather blocks that will give you the most for your money. Here's how:

- ✓ **Economical:** A low feeding rate of 0.5 to 1 lb per head daily can significantly minimize your feeding costs on a cost per head per day basis.
- ✓ **High Mineral Fortification:** This supplement is Vitamin and Mineral fortified eliminating the need to feed additional free-choice minerals, resulting in a significant supplemental feed cost savings.
- ✓ **Weather Resistant:** The patented, "continuous flow" system creates a quality, low-moisture, exceptionally dense block that maintains its integrity even in hot, humid weather or precipitation.
- ✓ **Minimal Labor:** **SmartLic**[®] **NE-Mag 12** and **SmartLic**[®] **NE-Mag 22** are easy to feed. Simply place the blocks in areas of easy access to the cattle.
- ✓ **Returnable Steel Barrels** are economical and environmentally friendly and eliminate the expense of additional feeding equipment. Ask us about other available packaging options and packaging size options.

Feeding Applications	
Forage Quality	
Fair 10% to 14% Protein NE-Mag 12	Medium 10% Protein or Lower NE-Mag 22

NE-MAG 12, NE-MAG 22

FEEDING DIRECTIONS

Provide free choice as a supplement to pasture cattle at the rate of one block for each 15 to 25 head. Place in pasture near areas frequented by livestock, such as watering locations, shade or loafing areas. Cattle typically consume 0.75 pound per head daily. Consumption may vary depending on climate, grazing conditions, condition of livestock and/or availability of other feeds. In situations where climate and/or other factors result in consumption less than 0.75 pound per head daily, intake of supplement can be increased by providing additional blocks per pasture.

Provide access to fresh water and free-choice salt at all times.

*If cattle experience excessive stress such as adverse weather conditions, shipping, weaning, or periods of high production, switching to **SmartLic® StressLic® Supplement** is recommended.*

GUARANTEED ANALYSIS

Crude Protein, minimum	12.0, 22.0%*
Crude Fat, minimum.....	5.0%
